To our valued customers:

We at Uhler Dental Supply are proud to present our newest dental products catalog for all of your dental needs. We have some exciting new products in addition to our continued industry blue chip materials. Whether you're a new technician or you've been at it for 40 years... we have many things for you in the pages ahead.

For nearly sixty years we have been supplying the dental world with teeth. And while the 7 different lines of teeth we offer are still our specialty, we have hundreds of other lab materials available including our new Zirconia discs and CAD/CAM milling tools.

Our greatest strength is our customer service. We strive to find solutions to your everyday demands. Orders are processed and shipped without delay allowing you to efficiently fulfill your customers' needs.

Thank you for the confidence you have placed in us.

Best Regards,

Neil Uhler
President, Uhler Dental Supply, Inc.

Acrylics

UDS Heat & Self Cure Acrylics

UDS Heat Cure Denture Acrylic is our privately fabricated standard denture acrylic. UDS acrylic is a high strength denture polymer with an extended working time that allows a fast cure cycle (if needed for high production) while maintaining quality. UDS acrylic provides dimensional and color stability with an exceptionally smooth surface for easy finishing and patient comfort. The self cure UDS acrylic matches all heat cure shades and is perfect for relines and repairs. The unique polymer has the low flow characteristics needed for repair resin, yet flows just enough to make it easy for relines. Available in 1, 5, & 22 lbs. in the following shades: Original, Light Pink, Meharry, and Clear.

Reline Materials

Trusoft™ – Soft Reline Material

An excellent relining material formulated to remain soft for greater patient acceptance and comfort. Trusoft's elasticity reduces pain and tenderness on ridges.

- TRUSOFT Trusoft Soft Reline Material

TRUE-O Original Truliner®

Original Truliner is a PMMA chairside denture reline material formulated to last the life of the denture. The extremely fine-milled powder cures to a dense consistency and prevents the reline from assuming odors, tastes, or stains. Creates a strong permanent bond in as little as ten minutes that will not chip or discolor. Can also be used for repairs and orthodontic appliances. Powder available in pink shade.

- TRUE-O TRUE-O Original Truliner®

Versacryl Thermo-Dynamic Reline Material

Versacryl is a thermo-dynamic reline material. It can be heated in warm water for quick and simple fit adjustments. The materials temperature sensitivity reacts to the patient's body temperature, lending itself to a cushiony texture that both benefits comfort and fit. This lab kit is self-curing and pink in shade.

- VER-SC-LK Versacryl Lab Kit

- CSM-80 Clear Splint Material .080 (25 pack)

Dual Laminate

Pro-form Dual Laminate is a unique combination of two materials formed into a single laminated sheet. It was made specifically for use in bruxing cases. The soft liner assures patient comfort and the hard surface assures long lasting wear. The acrylic bonds to the hard surface allowing the dental technician to modify the occlusal surface. 12 laminated sheets per package.

- DL-12 Dual Laminate (12 pack)

E-Gasket

A hard/soft thermally formed elastic material that makes an excellent gasket in pass through dentures. It chemically bonds to acrylic denture material, which means no separation problems. It is vacuum formed so the technician achieves a snap like fit immediately. Available in pink tint and clear.

- PRO-E-GAS-C Pro-E-Gasket Clear (12 pack)
- PRO-E-GAS-P Pro-E-Gasket Pink (12 pack)

Elasto-Vest Investing Compound

Elasto-Vest Resilient Investing Compound helps in the "break-out" of your acrylic denture work. Elasto-Vest coats, protects, and safeguards during the devesting process. For use on acrylic, porcelain & composite teeth.

- EV-20 Elasto-Vest 20 oz. Kit

UDS Plasticlear

Used in final packing. Stretches from 0.0015" to 0.0005" for use. Will not fold into denture. No checking, totally non-reactive to acrylics. Excellent results with clear as well as pigmented acrylic. Ideal for all types of plastic dentures, cleft palate cases, and corrective bites in orthodontic cases. Eliminates the need for tinfoiling even in clear palate cases. Available in boxes of 500, 4 x 4 sheets.

- P/C 500 UDS Plasticlear 4 x 4 Sheets/ Final Packing (500 pack)

UDS Plastipac

For trial packing, plastic film separates the cast from the denture. It is so thin that the surface produced is unsurpassed in accuracy. Stretches when pulled yet leaves no wrinkles, folds, or creases. Plastipac eliminates tinfoiling and lacquering the cast (and the subsequent cleaning). Available in boxes of 1000, 4 x 4 or 5 x 5 sheets.

- P/P4-1000 UDS Plastipac 4 x 4 Sheets/ Trial Packing (1,000 pack)
- P/P5-1000 UDS Plastipac 5 x 5 Sheets / Trial Packing (1,000 pack)

Mouthguard Laminates

Excellent tensile strength makes the Pro-form laminate the material of choice for custom made mouthguards.

- MG-C Pro-form Mouthguard Clear (12 pack)

Niteguard

This laminate or layered soft material was made specifically for nighttime bruxers. The layering gives the thermoplastic a more abrasion resistant characteristic that will withstand grinding better than traditional soft sheet materials.

- Available in packages of 12 laminates.
- NG-12 Proform Nite Guards (12 pack)

Soft EVA

Soft EVA is a soft and clear material used for bleaching trays, soft bruxing, custom fluoride trays, and model duplications. The sheets are 5" x 5" and 25 per box. Available in .040, .060, .080 and .120.

- SOFT-EVA-40 Soft EVA .040 Material (25 pack)
- SOFT-EVA-60 Soft EVA .060 Material (25 pack)
- SOFT-EVA-80 Soft EVA .080 Material (25 pack)
- SOFT-EVA-120 Soft EVA .120 Material (25 pack)

Waxes

UDS Set Up Wax

The ultimate wax for set ups and try-ins. Excellent workability and long working time. CAD/CAM Discs

Iodentine PMMA Discs

Iodentine Discs are manufactured with high molecular weight poly-methyl methacrylate (PMMA) resin, similar to that used in the manufacturing of artificial teeth. This material provides greater strength and toughness, and is therefore ideal for the production of long term dental crowns and short bridges. These discs are suitable for use with all regular CAD-CAM milling systems. The diameters of these discs are 98.5 mm.
